

# Embozene® Microspheres

CALIBRATION • CONTROL • CONFIDENCE

## Precision Calibration

DISTINCT SIZES FOR COMPLEX PROCEDURES

**Embozene® Microspheres** are offered in the broadest range of tightly calibrated sizes of any embolic microsphere available. Specific sizes of 40  $\mu\text{m}$  up to 1300  $\mu\text{m}$  microspheres enable selective and targeted embolization procedures.

## Procedural Control

EASY TO SEE, EASY TO USE

Distinguished as the only color-coded platform of spherical embolic agents on the market, Embozene® Microspheres are highly visible through syringes for instant size confirmation to improve procedural safety.

## Confidence by Design

THE BEST PHYSICIANS DESERVE THE BEST PRODUCTS

Embozene® Microspheres have been formulated and precisely calibrated to achieve a controlled microinjection. Exact, efficient, and effective, Embozene® Microspheres are a comprehensive embolic solution.

exact.  
efficient.  
effective.

# Embozene® Microspheres

## PRODUCT CATALOG

The uniquely color-coded sizing of Embozene® Microspheres is evident in the packaging, the syringe, and the microspheres themselves.

Embozene® Microspheres are indicated for use in embolization of hypervascular tumors and arteriovenous malformations including:

- Uterine Fibroids
- Tumors of the Head, Neck, Torso and Skeletal System
- Neurovascular and Peripheral
- Arteriovenous Malformations
- Hepatocellular Carcinoma
- Bleeding and Trauma
- Pre-Operative Reduction of Bleeding (Except for the Central Nervous System)

Embozene® Microspheres are available in prefilled 1 mL and 2 mL syringes.

Size	REF 1 mL	REF 2 mL
40µm	10410-S1	10420-S1
75µm	10710-S1	10720-S1
100µm	11010-S1	11020-S1
250µm	12010-S1	12020-S1
400µm	14010-S1	14020-S1
500µm	15010-S1	15020-S1
700µm	17010-S1	17020-S1
900µm	19010-S1	19020-S1
1100µm	111010-S1	111020-S1
1300µm	113010-S1	113020-S1

- Available in Color-Advanced and Opaque (Non-colored)
- Sold in Single Units
- Stable for 3 Years from the Date of Manufacture\*
